Contents

Introduction.....1

1 Educational Data Mining.....4

1.1. The definition of data mining.....4
1.2. Data Mining Tasks.....5
1.3. Categories of Data Mining Algorithms.....5
1.4. Educational data mining.....7
1.4.1. Data Mining Techniques in Educational Systems.....8
1.4.2. Classification.....9
1.4.3. Association Rules.....10
1.4.4. Bayesian Network.....11
1.4.5. Clustering.....14
1.4.6. Regression.....20
1.4.7. Support Vector Machines.....21
1.5. Main Applications of EDM methods.....22
1.6. Open Issues in EDM.....23

2 Data Warehousing.....24

2.1. Definition of a Data Warehouse.....24
2.2. Transaction Processing versus Decision Support Databases.....26
2.1.1. Online Analytical Processing (OLAP).....26
2.1.2. Online Transaction Processing (OLTP).....26
2.3. Data Mart.....27
2.4. Structure of the DW.....28
2.5. DW Modeling Techniques.....30
2.5.1. Benefits of Data Warehousing.....33
2.5.2. DW Modeling Tools.....34
2.5.3. Data Analysis and Assessment Tools.....35
2.6. Data Warehouse in Education.....36
2.6.1. Administrative DW Solutions.....40

3 Data Mining Applications in Higher Education.....41

3.1. Background of Educational Systems Based on Indicators.....41
3.2. Data Mining: a Way to Improve Todays Higher Learning Institutions.....42
3.2.1. Analysis of Previous Data Mining Applications in Education Systems.....43
3.2.1.1. Predicting Alumni Pledge.....45
3.2.1.2. Uses of Data Mining in CRCT Scores.....45
3.2.1.3. Creating Meaningful Learning Outcome Typologies.....46
3.2.1.4. Use Data Mining Techniques to Develop Institutional Typologies.....46
3.2.1.5. Academic Planning and Interventions Transfer Prediction.....47
3.2.1.6. Predicting and Clustering Persisters and Non-Persisters.....47
3.2.1.7. Predicting a Student's Performance.....48
3.2.1.8. Improving Quality of Graduate Students by Data Mining.....48
3.3. Proposed Analysis Guideline (DM-HEDU) for Application of Data Mining in Higher

Learning Institution.....49
3.4. Data Analysis and Investigation 54
3.5. Data Mining Modeling..... 56
3.5.1. Predictive Data Mining Models.....56
3.5.2. Descriptive Data Mining Modeling.....59
3.6. Analysis and Discussion..... 61

4 Developing and Implementing Using Business SQL Intelligence development Studio 2008.....66
4.1. Microsoft Business Intelligence (BI) application architecture.....66
4.2. SSAS Developer and Admin Interfaces.....70
4.3. Designing Data warehouse.....74
4.4. Implementing an Analysis Services Data warehouse.....78
4.5. Implementing data mining structures.....88

Conclusions and Feature Work

References
