

List of Figures

Figure 1.1	Space of Software Agents.....	6
Figure 1.2	Mobile agents wander around in the network.....	7
Figure 1.3	Basic structure of a mobile agent.....	8
Figure1.4	Code moves from site to site.....	10
Figure 1.5	Traditional client/server communication.....	15
Figure 1.6	Communication with the use of mobile agents.....	16
Figure 2.1	Types of port scans	30
Figure 2.2	TCP Header – Flags.....	33
Figure 2.2	Single-source and Distributed port scans.....	35
Figure 2.3	Single-source scan types with its ports details.....	36
Figure 2.4	Hierarchy of port scan attack detection approaches.....	37
Figure2.5	TCP sequence and SYN scan.....	40
Figure3.1	Tahiti Server.....	48
Figure 3.1	Mobile agent to collect all connected PCs in LAN.....	58
Figure3.2	The mobile agent finished searching for connected PCs.....	58
Figure3.3	The mobile agent finished dispatching agents to all PCs dispatching.....	59
Figure3.4	The main interface for each mobile agent.....	59
Figure3.5	The window after 20 packets.....	60
Figure3.6	The window after 40 packets.....	60
Figure3.7	The window after 60 packets.....	60
Figure3.8	IP in the black list.....	60
Figure3.9	The window shows after the system detect a scanner IP.....	61
Figure3.10	The window shows after the system detects a suspicious IP	61
Figure3.11	Suspicious IP sends two packets with consecutive destination ports.....	61
Figure3.12	Suspicious IP sends two packets with the same destination ports.....	62
Figure3.13	Suspicious IP repeated 3 times in a suspicious list.....	62
Figure3.14	Add IP to the Black-List.....	62
Figure3.15	Remove IP from the black-List.....	62
Figure3.16	IPs statistics.....	63

List of tables

Table 2.1 Commonly used TCP Scans.....	42
Table 2.2 Details of port scan types and their firewall level detection possibilities.....	45
